PROFESSIONAL EXPERIENCE

Aptive Environmental | Provo, UT

Jan 2022 – Present

Manager, Platform Operations - Oct 2025 – Present

- Manage a team of devops engineers responsible for all infrastructure supporting a custom-built internal platform and CRM serving field operations nationwide
- Lead the infrastructure architecture and buildout for a company-wide platform migration, transitioning from legacy and third-party software to a modern microservice and event-driven architecture
- Architect and manage production environments across AWS (EKS, ECS, RDS, ElastiCache, ECR, Secrets Manager, CloudWatch) and an operations cluster in DigitalOcean, with on-prem K3s staging in the corporate datacenter. frontend applications via Cloudflare Pages/Workers and Vercel.
- Own ~\$500K annual infrastructure budget, driving cost optimization and capacity planning across cloud and on-prem environments
- Own cybersecurity posture for platform infrastructure including secrets management, infrastructure hardening, and SIEM/XDR management
- Build and maintain all CI/CD pipelines in GitHub Actions and manage infrastructure-as-code with Terraform and Pulumi across all non-database resources
- Manage observability infrastructure including OpenTelemetry pipelines, Grafana, Loki, Prometheus, Tempo, and Observe for monitoring, logging, tracing, and alerting
- Manage event-driven messaging infrastructure including RabbitMQ and CloudAMQP supporting the platform's microservice architecture
- Evaluated and iterated through multiple orchestration strategies (Docker Compose, Docker Swarm, K3s, ECS) before establishing EKS as the production standard
- Implemented the company's outage management process including severity/priority definitions, runbooks, and alerting, deploying FireHydrant as the incident management platform
- Manage the corporate datacenter infrastructure including on-prem Kubernetes clusters and supporting services

Systems Engineer > Systems Engineer II > Systems Engineer IV - Dec 2023 – Oct 2025

- Led full network architecture and installation for a new 130K+ sqft corporate campus with a \$2M budget
- Reduced annual software spend by \$120K+ through contract negotiations and platform consolidation across the organization
- Led the ground-up implementation of ServiceNow across the organization, deploying ITSM, ITAM, HAM, SAM, Employee Portal, Service Portal, and Now Mobile
- Built custom applications and workflows using App Engine Studio while maintaining ServiceNow implementation best practices
- Selected for ServiceNow's Product Advisory Council for GenAI, contributing feedback on product direction alongside enterprise customers
- Installed network and training equipment in 60+ field offices, unifying the corporate network and improving remote office productivity
- Matured security posture by implementing SSO, employee lifecycle management, passwordless authentication, and access governance company-wide
- Implemented and managed asset management systems and processes for over 7,500 assets totaling \$3.7M+
- Mentored junior engineers and drove team standards for automation and infrastructure reliability

Systems Administrator - Dec 2022 – Dec 2023

- Transitioned from support into ownership of corporate business applications including Atlassian, ServiceNow, Okta, Google Workspace, AWS, Active Directory, and Cisco Meraki
- Managed MDM solutions and endpoint management across the organization
- Partnered with the engineering team to implement Okta and establish identity and access management and governance practices company-wide

Technical Support Analyst - Jan 2022 – Dec 2022

- Joined as part of the company's first in-house IT team, stepping into a large backlog of support tickets across thousands of employees
- Drove high-volume ticket resolution while managing hardware deployment and retrieval across the organization

- Designed and implemented workflow and process improvements that increased team efficiency, clearing the backlog to zero and freeing capacity for strategic projects
- Managed device provisioning and asset tracking at scale during a period of rapid IT buildout

Dormy | United States (Remote)

Feb 2025 – Aug 2025

Founder

- Founded and built a property management platform that handled the full tenant lifecycle from discovery through lease completion, including rent collection and contract management
- Onboarded a mid-sized property management company with active tenants processing payments through the platform
- Built the web application using React, Vite, and TypeScript with a GoLang backend, deployed on self-hosted Kubernetes (K3s)
- Pivoted to a consumer-first model with a swipe-based property discovery app, built natively in Swift and published on the iOS App Store
- Owned all product decisions end-to-end: architecture, development, deployment, and go-to-market strategy

Namify | Springville, UT

Aug 2021 – Jan 2022

Systems Administrator

- Acted as the IT owner for the organization, responsible for all technology functions including helpdesk, networking, cybersecurity, and software administration
- Supported both office endpoints and production equipment including laser engravers, embroidery machines, and banner printers
- Managed a Windows Server environment with legacy application support, maintaining uptime and reliability across aging infrastructure
- Administered employee lifecycle processes from onboarding through offboarding, including device provisioning, account management, and access controls
- Owned asset management for all company technology including laptops, phones, and production hardware
- Implemented load balancing for web services and deployed workflow automations to improve operational efficiency

CORE COMPETENCIES

Infrastructure & Networking: Cisco Meraki · Ubiquiti/UniFi · Active Directory · Proxmox · Cloudflare
Cloud & DevOps: AWS · DigitalOcean · Kubernetes · Docker · Terraform · Pulumi · CI/CD · GitHub
Platforms & Identity: ServiceNow · Okta · Google Workspace · Atlassian · Kandji · Identity & Access Management
Development: GoLang · TypeScript · SQL · Automation
Leadership & Business: Team Leadership · Project Management · Budget Management · Contract Negotiation · Data Analysis · Communication
Secret Weapon: Conveniently Lucky

EDUCATION

Master of Business Administration, Technology Management Utah Valley University, Orem, Utah	Anticipated May 2028
Bachelor of Science, Technology Management Utah Valley University, Orem, Utah	Anticipated May 2027
Associate of Science Utah Valley University, Orem, Utah	May 2019

CERTIFICATIONS & ADDITIONAL EXPERIENCE

- Product Advisory Council Member – GenAI, ServiceNow
- ServiceNow Certified Systems Administrator
- ServiceNow Certified Administrator
- Okta Certified Professional
- Okta Certified Administrator
